CaseProof scenario library

21 complete test scenarios

1. Sign in as Alex Chen. Start a NEW case for each scenario and use only that folder's files.

2. One case is one sale. The seller issues the invoice; the buyer or a permitted logistics provider confirms receipt. Different letterheads do not mean different sales.

3. Most scenarios use Your documents. Scenarios 17, 20 and 21 use the named Demo scenario so the clock, withdrawal and structured-response controls are available.

4. Upload only the Start with files. Keep reference templates in the optional reference fields. Leave Written message blank unless the instructions provide wording.

5. Wait for each agent run to settle. For a correction, select the exact earlier source under Replacing an earlier document?. For another delivery, select No - adding new evidence.

6. Use the sample policy unless a scenario explicitly requires a published change. A case can correctly finish on hold or remain open when evidence is unsafe or unsupported. Document review never approves financing.

Choose a flow

Document checks

01 Everything agrees · 02 The invoice total is wrong · 03 The delivery is incomplete · 04 A copied receipt counts once · 06 Dispatched does not mean received · 07 Two gaps, one follow-up · 08 A running total is not a new delivery

Human review

05 The buyer disputes a receipt · 09 A correction changes the sale · 10 A message agrees with the receipt · 11 A message is unrelated to the checks · 12 A document cannot instruct the agent · 13 A valid invoice needs wider review

Document appearance

14 Documents match their reference forms · 15 A supplier changes its invoice form · 16 An invoice number has been overwritten

Follow-up and recovery

17 Reminder, escalation, then evidence · 18 Resume after a model outage · 19 A supervisor extends the run allowance · 20 A receipt is withdrawn after completion · 21 Manual, shadow and autonomous modes

01 / Document checks

Everything agrees

A correct invoice and full proof of delivery.

Seabrook Packaging Pte Ltd sells to Elmwood Retail Pte Ltd. Invoice SP-2026-1101.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

Invoice total: 120 x SGD 18.50 = SGD 2,220.00. Delivery: 120 of 120 cartons received. Both checks should pass.

Actions

1. Create a new case with 01 as the Invoice PDF and 02 as a Delivery receipt PDF. Leave Written message blank.

2. Wait for the agent to finish. Open Review summary when the case says Review complete.

Expected final result

Review complete, with both checklist questions resolved. This completes document review; it does not approve financing.

02 / Document checks

The invoice total is wrong

Fix the amount while retaining the original invoice in history.

Meridian Office Supply Pte Ltd sells to Juniper Business Centre Pte Ltd. Invoice MO-2026-2201.

Start with

01-invoice-incorrect.pdf, 02-full-receipt.pdf

Expected first result

Delivery is complete. The invoice states SGD 2,680.00, but 80 x SGD 32.50 = SGD 2,600.00. Expect a request for an invoice correction.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Leave Written message blank.

2. After the correction request appears, choose Add documents or reply. Put 03 in Invoice PDF.

3. Under Replacing an earlier document?, select Invoice MO-2026-2201, version 1. Upload only this one correction. Leave Written reply blank.

4. Wait for the agent. The earlier invoice should remain visible as Superseded.

Expected final result

The current invoice total is SGD 2,600.00, both checks pass, and the document review should complete.

03 / Document checks

The delivery is incomplete

Add proof of a second delivery without replacing the first receipt.

Harbour Hygiene Supply Pte Ltd sells to Fernvale Hospitality Pte Ltd. Invoice HH-2026-3301.

Start with

01-invoice.pdf, 02-first-delivery-120.pdf

Expected first result

The SGD 2,550.00 invoice is correct. Only 120 of 200 packs have a receipt; the agent should request evidence for the other 80 packs.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Leave Written message blank.

2. When the case is waiting for delivery evidence, add 03 in Delivery receipt PDFs.

3. Keep Replacing an earlier document? set to No - adding new evidence. Leave Written reply blank.

4. Wait for the agent. The receipt check should show two separate deliveries: 120 + 80 packs.

Expected final result

200 of 200 packs are covered. Both receipts stay active and the document review should complete.

04 / Document checks

A copied receipt counts once

A repeated PDF must not turn one delivery into two.

Beacon Storage Supplies Pte Ltd sells to Willow Logistics Pte Ltd. Invoice BS-2026-4401.

Start with

01-invoice.pdf, 02-first-receipt-60.pdf, 03-copy-of-first-receipt.pdf

Expected first result

The invoice is SGD 2,400.00. Files 02 and 03 are identical copies of one receipt: coverage must remain 60 of 100 boxes, not 120.

Actions

1. Create a new case with 01 as the invoice. Select BOTH 02 and 03 in Delivery receipt PDFs in the same upload.

2. Leave Written message blank. Wait for the agent and confirm only 60 boxes count. The duplicate can be suppressed rather than displayed as a separate source.

3. Add 04 as a Delivery receipt PDF. Keep replacement set to No - adding new evidence.

4. Wait for the agent. Coverage should become 60 + 40 = 100 boxes. If you try uploading an already saved PDF again, an Already received message is also valid behaviour.

Expected final result

The extra copy never increases coverage. Only the new second delivery brings coverage to 100 and allows completion.

05 / Human review

The buyer disputes a receipt

A written reply reopens a completed review and needs a human decision.

Alton Labware Pte Ltd sells to Pinecrest Diagnostics Pte Ltd. Invoice AL-2026-5501.

Start with

01-invoice.pdf, 02-original-receipt-100.pdf

Expected first result

The SGD 4,500.00 invoice and original 100-crate receipt initially agree. Wait for Review complete before adding the buyer's message.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Leave Written message blank and wait for Review complete.

2. Choose Add documents or reply, upload no file, and paste the text from buyer-reply.txt into Written reply. Put Maya Ho - Pinecrest Diagnostics Pte Ltd in Who wrote this message?.

3. The case should reopen with a decision task. In Decisions, open and claim the task as Alex Chen. Select Retain the dispute and request specific evidence, covering the message and receipt.

4. Use receipt PD-GRN-5501, delivery AL-DEL-5501 and claimed quantity 80. Reason: Buyer reports only 80 crates in the first delivery; request a corrected receipt and proof of the balance. Save the decision.

5. When corrected evidence is requested, add 03 as a Delivery receipt PDF and select the earlier PD-GRN-5501 receipt under Replacing an earlier document?. Upload it alone, without another written reply.

6. Add 04 as a Delivery receipt PDF, keeping replacement set to No. Wait for the agent. Any remaining message-review task needs a recorded human disposition before completion.

Expected final result

The old 100-crate receipt is superseded. The current evidence is 80 + 20 = 100 crates. Completion requires the human decision as well as matching documents.

Message: buyer-reply.txt. Author: Maya Ho - Pinecrest Diagnostics Pte Ltd

06 / Document checks

Dispatched does not mean received

The seller's dispatch note is not the buyer's receipt acknowledgement.

Lakeside Maintenance Supply Pte Ltd sells to Riverside Property Services Pte Ltd. Invoice LM-2026-6601.

Start with

01-invoice.pdf, 02-seller-dispatch-note.pdf

Expected first result

The SGD 2,150.00 invoice is correct. The dispatch note says goods left the seller; it does not prove the buyer received them. Expect the note to be flagged and buyer receipt evidence to be requested, possibly through a review task.

Actions

1. Start with 01 as the invoice. Deliberately put 02 in Delivery receipt PDFs to test whether the app rejects dispatch as proof of receipt. Leave Written message blank.

2. Wait for the agent. Confirm that the dispatch note does not count as 50 cartons received. A flagged document or an evidence-review task is expected, not an app failure.

3. Add 03 in Delivery receipt PDFs. Keep Replacing an earlier document? set to No: a buyer's receipt is new evidence, not a replacement for the seller's dispatch note.

4. After the buyer receipt is accepted, open the Rejected document decision. Choose Exclude this rejected document from the review. Reason: The seller dispatch note is not receipt evidence; the buyer receipt independently confirms all 50 cartons.

Expected final result

The rejected dispatch note remains in history and counts toward no check. The buyer receipt covers all 50 cartons, and the recorded exclusion allows completion.

07 / Document checks

Two gaps, one follow-up

One request should cover both the wrong total and the missing delivery.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-0701.

Start with

01-invoice.pdf, 02-first-receipt-60.pdf

Expected first result

100 x SGD 25.00 = SGD 2,500.00, but the invoice states 2,600.00. Only 60 boxes are covered. One request should contain two items.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Leave Written message blank.

2. Open Requests & replies: one request should ask for an invoice correction and evidence for the other 40 boxes.

3. Add 03 as the Invoice PDF, replacing the original invoice version 1. The receipt gap must remain open.

4. Add 04 as a new Delivery receipt PDF. Keep replacement set to No. Both gaps should now be resolved.

Expected final result

Document review completes with a retained summary.

08 / Document checks

A running total is not a new delivery

Replace a cumulative receipt with the quantity for that delivery alone.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-0801.

Setup

As supervisor, open Policy > Edit policy > Documents and corrections. Allow Quantity basis (cumulative or per delivery) for Delivery receipt corrections, then publish a new version before creating this case. This permits a cumulative total to be clarified as a per-delivery quantity; it does not change older cases.

Start with

01-invoice.pdf, 02-first-receipt-60.pdf, 03-cumulative-receipt-100.pdf

Expected first result

Do not add 60 + 100. The second receipt is cumulative, so receipt coverage needs clarification.

Actions

1. Start with 01 as the invoice and BOTH 02 and 03 as delivery receipts.

2. Inspect the cumulative-quantity finding and the clarification request. The case must remain open.

3. Add 04 as a receipt and choose the earlier CC-GRN-0802 version 1 under Replacing an earlier document?.

4. Wait for the agent. The final evidence should cover 60 + 40 = 100 boxes.

Expected final result

Document review completes with a retained summary.

09 / Human review

A correction changes the sale

Reject a changed quantity even when its multiplication is correct.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-0901.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

The original amount is wrong. The later changed-quantity invoice is intentionally outside correction authority.

Actions

1. Start with 01 and 02. Wait for the invoice-correction request.

2. Upload 03 as an invoice replacing version 1. This changes the quantity to 104, so it must not silently amend the financed sale.

3. Open the evidence decision and choose Authorise a further request. Reason: Keep the original 100-box sale; request an amount-only correction.

4. Add 04 as the invoice, replacing the original version 1 rather than the rejected copy. Wait for completion.

Expected final result

Document review completes with a retained summary.

10 / Human review

A message agrees with the receipt

A harmless explanation still receives a recorded human decision.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1001.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

Both documents agree, but the written message must receive a human decision before completion.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Paste buyer-reply.txt into Written message and enter the named sender.

2. Wait for a message-review task. Open its source comparison and confirm the agent has kept the document facts unchanged.

3. Choose Record a source-backed interpretation. Record why the message does not change receipt coverage.

4. Wait for completion and inspect the saved decision in Review summary.

Expected final result

Document review completes with a retained summary.

Message: buyer-reply.txt. Author: Marcus Tan - Cedar Commercial Services Pte Ltd

11 / Human review

A message is unrelated to the checks

An administrative note does not become delivery evidence.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1101.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

Both documents agree, but the written message must receive a human decision before completion.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Paste buyer-reply.txt into Written message and enter the named sender.

2. Wait for a message-review task. Open its source comparison and confirm the agent has kept the document facts unchanged.

3. Choose Mark as not relevant to the checklist. Record why the message does not change receipt coverage.

4. Wait for completion and inspect the saved decision in Review summary.

Expected final result

Document review completes with a retained summary.

Message: buyer-reply.txt. Author: Marcus Tan - Cedar Commercial Services Pte Ltd

12 / Human review

A document cannot instruct the agent

Ignore embedded requests to bypass checks or read another case.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1201.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

Both documents agree, but the written message must receive a human decision before completion.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Paste buyer-reply.txt into Written message and enter the named sender.

2. Wait for a message-review task. Open its source comparison and confirm the agent has kept the document facts unchanged.

3. Choose Mark as not relevant to the checklist. Record why the message does not change receipt coverage.

4. Wait for completion and inspect the saved decision in Review summary.

Expected final result

Document review completes with a retained summary.

Message: buyer-reply.txt. Author: Marcus Tan - Cedar Commercial Services Pte Ltd

13 / Human review

A valid invoice needs wider review

Tax and multiple lines are outside this sample checklist.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1301.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

The invoice is internally consistent, but GST and a second goods line are outside the automatic checklist. It must not be marked complete.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Leave Written message blank.

2. Inspect the unsupported-document finding. The valid GST must not be removed just to make the software pass.

3. The case remains open for a bank process that supports tax and multiple lines. If a reviewer task offers Keep on hold, record this limitation and choose it.

Expected final result

The review remains open. This is the correct safe outcome for a transaction outside the supported checklist.

14 / Document appearance

Documents match their reference forms

Compare both seller and buyer layouts while allowing transaction values to differ.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1401.

Setup

In Optional document checks, enable possible tampering and select the two reference PDFs in their matching reference fields. Reference files are examples supplied by the reviewer, not proof of authenticity.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

The invoice is SGD 2,500.00 and the buyer confirms all 100 boxes.

Actions

1. Start with 01 as the invoice and 02 as the receipt. Put reference-invoice.pdf and reference-receipt.pdf in their reference fields, not the evidence inputs.

2. Wait for the document appearance results. The layouts should match despite different transaction references.

3. Open Review summary and confirm the selected references and visual results are recorded.

Expected final result

Document review completes with a retained summary.

A supplier changes its invoice form

A template mismatch is a review question, not proof of fraud.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1501.

Setup

In Optional document checks, supply reference-invoice.pdf as the Invoice reference PDF. Leave tampering unchecked to isolate template comparison.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

The business values agree, but the supplied invoice uses a different header and table layout from the reference.

Actions

1. Upload 01 as the invoice and 02 as the receipt, selecting reference-invoice.pdf only in the invoice reference field.

2. Open the document appearance task. Compare the highlighted areas with Show reference template.

3. For this fictional test, record: The issuer has confirmed its new form; transaction details are unchanged. Choose Record appearance review and continue.

4. Both the reference mismatch and the recorded human acceptance should remain in the summary.

Expected final result

Document review completes with a retained summary.

An invoice number has been overwritten

Locate a covered identifier and keep the case on hold for issuer verification.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1601.

Setup

Enable Check for possible document tampering. The invoice is an intentionally altered fictional test fixture: its old header number remains under a covering patch.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

The visible values can agree while PDF layers reveal an overwritten invoice number. Appearance findings must prevent completion.

Actions

1. Upload 01 and 02, with possible tampering enabled. Do not use reference-invoice.pdf as additional evidence; it is available for visual comparison only.

2. Open the appearance task and click the finding to highlight the edited identifier. Inspect both the PDF-layer observation and any Gemini observation.

3. Choose Keep the case on hold. Reason: An overwritten identifier needs independent confirmation and a newly issued original from the seller.

Expected final result

Paused on hold, with the suspect area and reviewer reason retained. The app must not declare the document authentic or approve financing.

17 / Follow-up and recovery

Reminder, escalation, then evidence

Waiting consumes no model calls; a reviewer can authorise another request.

Jurong Fresh Produce Pte Ltd sells to East Coast Hospitality Group Pte Ltd. Invoice INV-505.

Setup

Use New case > Demo scenarios > Fresh produce - invoice INV-505, in Autonomous mode. The included documents match that prepared case. The demo clock is available only on prepared cases.

Start with

01-inv-505-v1.pdf

Expected first result

An invoice with no receipt waits for the business. Under the default policy, 48 hours triggers a reminder and another 72 hours triggers human escalation.

Actions

1. Create the INV-505 demo case and wait for the missing-receipt request.

2. In Customer exchange (demo), advance the demo clock by 48 hours. Verify one reminder appears without a new model call.

3. Advance another 72 hours. Open the No reply decision and authorise a further request round, explaining that the business needs one more chance to reply.

4. In Customer exchange (demo), send Receipt R1 for all 240 crates. Wait for completion.

Expected final result

Document review completes with a retained summary.

Resume after a model outage

A temporary model failure preserves work and opens a recovery task.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1801.

Setup

Run this in an isolated demo workspace with no other active cases. In Operations, simulate a timeout for the next 10 model calls; this affects the organisation, so clear it immediately after the pause.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

The case pauses on a simulated model timeout. Its originals and queued work remain saved.

Actions

1. Set the timeout simulation, then start a new upload case with 01 and 02.

2. Wait for Paused and a Service failure task. Open Evidence to confirm the originals remain accessible.

3. In Operations, clear the simulated failure. Return to the case and choose Resume automation on its recovery task, recording that the service is available.

4. Wait for completion. Do not upload the same documents again.

Expected final result

Document review completes with a retained summary.

A supervisor extends the run allowance

Reaching an automation limit does not discard the case.

Alder Trade Supplies Pte Ltd sells to Cedar Commercial Services Pte Ltd. Invoice AT-2026-1901.

Setup

Use an isolated demo workspace. As supervisor, publish a temporary policy with Agent runs per case set to 1, retaining the other defaults. Create this case, then restore 12 runs in a new published version for subsequent cases. This case stays pinned to the one-run policy.

Start with

01-invoice.pdf, 02-full-receipt.pdf

Expected first result

The first run reads the two PDFs. The next run hits the one-run allowance and pauses before completion.

Actions

1. Start with 01 and 02 under the temporary one-run policy. Leave optional visual checks off.

2. When Budget exhausted appears, open the decision as Alex Chen or another supervisor.

3. Choose Grant an extension: 4 extra agent runs and USD 0.25. Reason: Allow the already-read documents to finish review.

4. Wait for completion. The extension and original policy version remain in history.

Expected final result

Document review completes with a retained summary.

A receipt is withdrawn after completion

Reopen only affected work and retain the superseded summary.

Orchid Bay Garments Pte Ltd sells to Lionstar Retail Pte Ltd. Invoice INV-303.

Setup

Use New case > Demo scenarios > Uniform order - invoice INV-303, in Autonomous mode. Its buyer-authorised logistics provider can issue receipt evidence in this prepared case. Ordinary uploads require a buyer-issued receipt.

Start with

01-inv-303-v1.pdf, 02-r1-303.pdf

Expected first result

A valid invoice and authorised logistics receipt initially complete. Withdrawal must invalidate the delivery result.

Actions

1. Create INV-303 and wait for Review complete. Download its summary.

2. In Customer exchange (demo), send Seller withdraws the receipt.

3. Confirm the case reopens: the invoice check still passes, receipt coverage is missing, and the earlier summary is Superseded.

4. Send Reissued receipt for all 50 cartons from the logistics provider. Wait for a new completed summary.

Expected final result

Document review completes with a retained summary.

Manual, shadow and autonomous modes

The same case obeys its selected action authority.

Harbour Lane Trading Pte Ltd sells to Meridian Foods Pte Ltd. Invoice INV-101.

Setup

Use New case > Demo scenarios > Packaging boxes - invoice INV-101. Select Off (manual) before creating the case. The included PDFs match this prepared sale.

Start with

01-inv-101-v1.pdf, 02-r1-d1.pdf

Expected first result

Off mode queues no agent. Manual checks expose both gaps; shadow mode may draft but must not issue a request.

Actions

1. Create INV-101 in Off (manual) mode. In Controls, run the manual checklist checks.

2. Switch to Shadow and run the agent if prompted. Inspect proposals: no request should be Issued and no review should complete.

3. Switch to Autonomous. The agent should issue the tracked request for both gaps.

4. In Customer exchange (demo), send the remaining-20-boxes dispatch update. It must not count as receipt.

5. Send Receipt R2 for D2, then its duplicate copy. The duplicate must not add another 20 boxes or reset allowances.

6. Send the amount-only invoice v2 correction. Wait for completion.

Expected final result

Document review completes with a retained summary.
